SUMMARY

Full Stack MERN Developer with hands-on experience with building web applications and AI-powered websites, with practical experience integrating AI APIs into production-ready applications

SKILLS

HTML | CSS/Tailwind | JavaScript/TypeScript | React.js | Node.js | Express.js | MongoDB | PostgreSQL | Python

PROJECTS

LeadWave – Facebook Messenger Automation SaaS

https://leadwave.online

TypeScript + React + Node.js/Express + PostgreSQL/Prisma + Redis/BullMQ

- Built and launched a multi-tenant SaaS that automates Facebook Page Messenger. It turns post comments and keywords into automated DM flows with lead capture, follow-ups and AI-powered replies, and runs in production on Cloudflare Pages, Render and Neon Postgres.
- Developed a TypeScript monorepo with a Node.js/Express REST API and a 35-model PostgreSQL schema built with Prisma. Event-driven Messenger webhooks have signature checks and duplicate filtering, and BullMQ/Redis queue workers handle comments, follow-ups, retriggers and AI jobs while respecting Messenger's 24-hour messaging window and send rate limits.
- Integrated Google Gemini AI to sort incoming messages and write replies from each business's own knowledge base, with a credit-based usage system. Added Google OAuth, Google Sheets lead sync and Paddle subscription billing with plan-based feature limits.
- Built a React + Tailwind dashboard with a visual automation builder, a unified inbox, contacts, a link-in-bio page builder and an admin view of growth numbers (MRR, signups, plan mix). Also built a 34-page Astro marketing site for SEO.

Morning Briefing Agent

https://morning-brief-frontend.vercel.app/

MERN Stack + Google Gemini AI + Telegram Bot API

- Built a website that delivers a personalized AI morning briefing to users via Telegram every day at their chosen time, covering live weather, top news headlines, and motivational quotes
- Developed Node.js/Express backend with MongoDB, JWT authentication, node-cron scheduler firing every minute with timezone-aware user matching, and integrated Google Gemini 1.5 Flash to generate natural, human-written briefing summaries
- Implemented Telegram Bot for delivery and account linking, OpenWeatherMap and NewsData.io API integrations, and a React/Vite dashboard for managing preferences and viewing briefing history

Expenses Tracker

https://expenses-tracker-one-rust.vercel.app

React + Vite + Tailwind CSS + Chart.js

- Built a finance tracking tool with expense categorization, budget management, and visual dashboards using Chart.js (pie charts, circular progress bars)
- Implemented React Context API for global state management and local storage for data persistence across sessions
- Delivered dark mode, responsive design, and seamless category deletion for an optimized user experience

EXPERIENCE

Wordpress Developer

MawkTech Space Sargodha

10/2025 - 04/2026 Sargodha

- Work as a WordPress Designer at MawkTech Space Sargodha (6 Months)

EDUCATION

Bachelor of Science in Information Technology (BS-IT)

Superior University Sargodha

2022 - 2026

CGPA

3.45 / 4.00
